

The Ohio Invasive Plants Council

OIPC is:

- A coalition of Ohio agencies, organizations, and individuals.
- Promoting public awareness of invasive species issues.
- Encouraging land management and research to detect invasive species and prevent new invasions into natural ecosystems.

Invasive species:

- Reduce biological diversity, change food webs, and displace wildlife.
- Put at least 42% of the federally endangered and threatened species in the United States at risk.
- Degrade Ohio's woodlands, wetlands, and prairies.

Participating in statewide efforts to address the threats of invasive species to Ohio's ecosystems and economy by providing leadership and promoting stewardship, education, research, and information exchange.

Contact the Ohio Invasive Plants Council to request posters, brochures, speakers, and other resources.
